### **POTENTIAL RISKS**

The Company's risk profile remains substantially unchanged from the previous quarter, with Global Brent Oil prices weakening during the Quarter and Natural gas prices strengthening marginally as compared to the previous Quarter. The escalation of instability in the middle east, coupled with the ongoing Ukraine conflict continues to create instability in global oil and gas prices and has the potential to impact the Company's future royalty receipts.

In addition, royalty receipts may be impacted by:

- any interruption to or suspension of production from ExxonMobil & Woodside in the Gippsland Basin with an impact to the Weeks Royalty; and
- changes to the value of royalty receipts as a result of US\$ and A\$ FX movements, oil and gas prices and the proportion of commodity sales that are hedged, unhedged and/or contracted.

## 2. Gippsland Basin – Weeks Royalty

During the Quarter, Fitzroy received a royalty payment through its wholly owned subsidiary, Royalco Resources Pty Ltd with respect to the 30 June 2024 Quarter of \$216,788. The royalty with respect to the September 2024 Quarter is expected to be received during December 2024. Total royalty revenue received from the Weeks royalty for the 12 months to 30 September 2024 is \$906,795 (PCP: \$1,088,694).

Fitzroy holds 1% of a 2.5% royalty (the 2.5% Royalty is known as the Weeks Royalty).

## 3. Canning Basin & Lennard Shelf Royalties

### 3.1 Buru Energy Limited (Buru)

Fitzroy did not receive any royalty receipts during the Quarter due to operations remaining suspended during the Quarter. Total royalty revenue received from the L20 Royalty for the 12 months to 30 September 2024 is \$93,266 (PCP: \$190,408).

In its Corporate Presentation released on 30 September 2025<sup>1</sup>, Buru outlined its strategic direction, including the following:

#### Foundation Business - Commercialising the Rafael Gas Discovery;

In 2021, Buru discovered Rafael, the first conventional gas and condensate field in the Canning Basin. Buru has advised that it is in the process of changing from a pure play explorer with a modest oil business, to a gas developer focussed on long term foundation cashflow with complementary growth.

Buru states that the foundation of the business is commercialising the Rafael Gas discovery. As outlined in the 30 September 2024 Corporate Presentation<sup>1</sup>, the timeline for commercialising the Rafael Gas Discovery is:

- Front End Engineering & Design (**FEED**) entry early 2025.
- Drill second Rafael well in 2025. Re-test/recomplete Rafael 1 well as producer.
- Final Investment Decision (**FID**) during late 2025.

#### Restart Ungani Production to provide near-term cashflow.

Buru outlined the plan to re-establish revenues from the oil business via a potential domestic offtake pathway and to pursue near-field exploration to extend production beyond the current known field life.

Full details of Buru's activities and announcements during the Quarter can be found at: [www.buruenergy.com](http://www.buruenergy.com).

Fitzroy holds a 2% net well head royalty over the tenements in the Canning Basin Royalty Deed, and a 3% net well head royalty over the tenements in the Lennard Shelf Royalty Deed. (See items 9.2 and 9.3 below).

#### 4. Bowden's Silver Project

The Bowdens Silver Project (**Bowdens**) is located in New South Wales, approximately 26kms east of Mudgee. Bowdens is the largest undeveloped silver deposit in Australia, with substantial resources and a considerable body of high-quality technical work already completed. Bowden's Silver is owned and being developed by Silver Mines Limited (ASX: SVL).

On 18 July 2024, SVL announced a A\$30.2 million convertible debenture funding package<sup>7</sup>. The funds raised will be used predominantly for drilling, engineering studies for the Definitive Feasibility Study, pre-construction activities and general and administrative costs associated with Bowdens.

On 16 August 2024<sup>8</sup>, SVL announced that a Court of Appeal had upheld an appeal, meaning that the development consent for the Bowdens Silver Project can no longer be relied upon by SVL. SVL and its legal advisors are currently working to assess the implications of this appeal.

On 15 October 2024<sup>9</sup>, subsequent to the end of the Quarter, SVL announced that the Bowdens Development Application (DA) remains alive and on foot and has not been finally determined by the consent authority, the Independent Planning Commission. SVL states that "we are now working through the steps required by the DPHI to achieve reinstatement of the consent, in a way that would satisfy the Court's concerns in relation to the assessment of the transmission line to provide power to the proposed mine site."

Fitzroy has a 2% Net Smelter Return reducing to 1% after the receipt of US\$5m, generated from the sale of any silver or other ores, concentrates or other primary, intermediate product or any other mineral substances (**product**) produced from within EL5920.

#### 5. Snowy River Gold Project - Snowy River Mine

The Snowy River Gold Project (formerly the Blackwater Gold Project) (**Project**) is located near Reefton, on the West Coast of the South Island of New Zealand and is being developed by Federation Mining Pty Ltd (**Federation**), who now holds 100% of the Project<sup>10</sup>.

In its most recent investor presentation, released on 10 October 2024<sup>11</sup>, Federation confirmed that it is targeting a decision to mine during calendar year 2024, with first production being targeted by the end of calendar year 2025.

Full details of Federation's activities and announcements can be found at: [www.federationmining.com.au](http://www.federationmining.com.au)

Fitzroy has a variable 1-3% Over Riding Return royalty over the Project. Federation (via its wholly owned subsidiary Tasman Mining Limited (**Tasman**)) holds an option to buy-out the Fitzroy royalty. The option to buy-out the royalty is exercisable at any time until a decision to mine for the sum of A\$11.6 million indexed from 31 March 2024<sup>12</sup> (**Buyout Price**).

A decision to mine the Snowy River Project is defined as being a date which is 20 business days after the date on which Federation:

1. has access to sufficient funds to complete the development of the Snowy River Project (including construction of the Plant) and to proceed to commercial production; and
2. holds in its bank account sufficient funds to pay the Buyout Price.

## **6. Sam's Creek Gold Project**

The Sam's Creek Gold Project (Sam's Creek) is located approximately 140 kilometres north-east of Reefton, on the north-west coast of the South Island of New Zealand and is being developed by Siren Gold Limited (ASX:SNG). Sam's Creek currently has a JORC 2012 Mineral Resource Estimate of 9.1Mt @ 2.8g/t Au for 824koz of contained gold<sup>6</sup>.

Through its wholly owned subsidiary Royalco Resources (No 1) Pty Ltd, Fitzroy has a 1% royalty on all product (gold, ores, concentrates or other minerals) produced from the Sam's Creek Gold Project.

## **7. Investment Highlights**

### **7.1 Byron Energy Limited**

Byron Energy Limited (**BYE**) is an independent oil and natural gas exploration and production company, headquartered in Australia, with operations in the shallow water offshore Louisiana in the Gulf of Mexico.

During the year ended 30 June 2024, the BYE Board proposed to shareholders that BYE delist from the ASX, primarily because of the persistent and excessive gap between the market value (share-market capitalisation) and what the BYE Board considered to be a fair value of the Company. This valuation gap was accentuated by the fact that BYE operates in the oil and gas sector which has become an out of favour sector for Australian institutional and retail investors for well communicated reasons<sup>13</sup>.

BYE shares ceased trading on the ASX at close of trade on 15 July 2024. The closing price of BYE shares on 28 June 2024 was \$0.52 per share, valuing Fitzroy's investment at financial year-end at approximately \$0.58 million.

Fitzroy continues to monitor its investment in Byron Energy Limited (**BYE**). Fitzroy holds 11.2m shares in BYE.

Full details of BYE's activities and announcements can be found at [www.byronenergy.com.au](http://www.byronenergy.com.au).

<sup>16</sup> Fitzroy is monitoring the activities on the 'Backreef Area' of EP 129 and L6, particularly those of Emperor Energy Ltd (ASX: EMP) (formerly Oil Basins Ltd). It is understood that Buru holds 100% of the Backreef Area on trust for Emperor Energy Ltd due to the completion of the drilling of the East Blina-1 well on 31 October 2012 in accordance with the 'Backreef Play Agreement' dated 30 October 2008. Until such time as a deed of covenant is executed, the contractual relationship governing the 3% royalty obligation (which is registered against EP 129 and L6) is between Fitzroy and Buru alone.
