POTENTIAL RISKS

The Company's risk profile remains substantially unchanged from the previous quarter, with Global Brent Oil prices experienced volatility but primarily level with the end of the Quarter and post Quarter-end. Natural gas prices strengthening as compared to the previous Quarter. The ongoing conflict in the middle east and Ukraine, coupled with the fallout from the announcement of US tariff's continues to create instability in global oil and gas prices and has the potential to impact the Company's future royalty receipts.

In addition, royalty receipts may be impacted by:

- any interruption to or suspension of production from ExxonMobil & Woodside in the Gippsland Basin with an impact to the Weeks Royalty; and
- changes to the value of royalty receipts as a result of US\$ and A\$ FX movements, oil and gas prices and the proportion of commodity sales that are hedged, unhedged and/or contracted, of which Fitzroy has not ability to control.

2. Gippsland Basin – Weeks Royalty

During the Quarter, Fitzroy received a royalty payment through its wholly owned subsidiary, Royalco Resources Pty Ltd with respect to the 30 June 2025 Quarter of \$171,609. The royalty with respect to the September 2025 Quarter is expected to be received during December 2025. Total royalty revenue received from the Weeks royalty for the 12 months to 30 September 2025 is \$619,145 (PCP: \$632,205).

Fitzroy holds 1% of a 2.5% royalty (the 2.5% Royalty is known as the Weeks Royalty).

3. Canning Basin & Lennard Shelf Royalties

3.1 Buru Energy Limited (Buru)

Fitzroy did not receive any royalty receipts during the Quarter due to the Ungani Oilfield Assets remaining under a care and maintenance program. The restart of Ungani production requires the renegotiation of certain commercial terms pursuant to the existing Ungani Native Title agreements and requisite field management regulatory approvals.

In its September Quarterly Activities Report (released subsequent to the end of the Quarter on 10 October 2025)⁶, Buru outlined the following:

- Rafael Gas Project Schedule, showing a Final Investment Decision (**FID**), targeted to be early 3Q 2026.
- 2 -year extension from the government to apply for a production licence over the Rafael Gas and Condensate Field.
- Environmental approval received for the planned 2026 Rafael resource appraisal campaign.
- Identified potentially material Flying Fox Prospect beneath the proven Rafael gas/condensate accumulation.

In its June Quarterly Activities Report⁷, Buru outlined that it had executed a Strategic Development Agreement (**SDA**) with Clean Energy Fuels Australia (**CEFA**) for the Rafael Gas Project - significantly derisking project development and the pathway to material first cashflow from late 2027. Under the SDA, CEFA is to finance, build, own and operate Rafael LNG and condensate infrastructure, limiting Buru's financial exposure to upstream gas production.

Full details of Buru's activities and announcements during the Quarter can be found at: www.buruenergy.com.

Fitzroy holds a 2% net well head royalty over the tenements in the Canning Basin Royalty Deed, and a 3% net well head royalty over the tenements in the Lennard Shelf Royalty Deed. (See items 9.2 and 9.3 below).

4. Bowden's Silver Project

The Bowdens Silver Project (**Bowdens**) is located in New South Wales, approximately 26kms east of Mudgee. Bowdens is the largest undeveloped silver deposit in Australia, with substantial resources and a considerable body of high-quality

technical work already completed. Bowden's Silver is owned and is being developed by Silver Mines Limited (ASX: SVL). Bowdens hosts a JORC 2012 Mineral Reserve of 179Mt at 58.0g/t silver, 0.39% zinc and 0.28% lead for 180 million ounces of silver and 334 million ounces of silver equivalent⁸.

On 15 July 2025¹, the Company advised that it has now provided all information requested by the New South Wales Department of Planning, Housing and Infrastructure (**DPHI**) to assist with the redetermination of the Development Application for Bowdens. This information will form the basis of the recommendation of the Bowdens Development Application to the New South Wales Independent Planning Commission in order to finalise the re-determination of the Bowdens Project.

Fitzroy has a 2% Net Smelter Return reducing to 1% after the receipt of US\$5m, generated from the sale of any silver or other ores, concentrates or other primary, intermediate product or any other mineral substances (**product**) produced from within EL5920.

5. Snowy River Gold Project - Snowy River Mine

The Snowy River Gold Project (formerly the Blackwater Gold Project) (**Project**) is located near Reefton, on the West Coast of the South Island of New Zealand and is being developed by Endura Mining Pty Ltd (formerly *Federation Mining Pty Ltd*) (**Endura**), who holds 100% of the Project. The Project hosts probable Ore Reserves of 244koz of gold grading 6.03g/t Au and Mineral Resources of 795koz of gold grading 23.1g/t Au⁹.

In its September Project Update (released subsequent to the end of the Quarter on 20 October 2025¹⁰), Endura confirmed the following:

- Completion of a A\$150 million equity raising to fund development of Snowy River.
- Contractor mobilised to commence construction of the processing plant.
- Reefton Motor Camp Cabins officially opened by the Minister for Resources.
- Company name changed to Endura Mining (effective 1 September 2025).

Full details of Endura's activities and announcements can be found at www.enduramining.com

Fitzroy holds a variable 1-3% Over Riding Return royalty over the Project. Endura (via its wholly owned subsidiary Tasman Mining Limited (**Tasman**)) holds an option to buy-out the Fitzroy royalty. The option to buy-out the royalty is exercisable at any time until a decision to mine for the sum of A\$11.6 million indexed from 31 March 2024¹¹ (**Buyout Price**). The current value of the Buyout Price (based on published CPI data¹²) is approximately A\$12.0 million.

A decision to mine the Snowy River Project is defined as being a date which is 20 business days after the date on which Endura:

1. has access to sufficient funds to complete the development of the Snowy River Project (including construction of the Plant) and to proceed to commercial production; and
2. holds in its bank account sufficient funds to pay the Buyout Price.

If the buy-out option is not exercised and the Snowy River project proceeds to commercial production, the operative provisions of the 1-3% royalty deed apply.

6. Sam's Creek Gold Project

The Sam's Creek Gold Project (Sam's Creek) is located approximately 140 kilometres north-east of Reefton, on the north-west coast of the South Island of New Zealand and is being developed by Siren Gold Limited (ASX:SNG). Sam's Creek currently has a JORC 2012 Mineral Resource Estimate of 9.1Mt @ 2.82g/t Au for 824koz of contained gold⁵.

- Siren is advancing the development pathway with preliminary Scoping Study and Mining Permit applications completed.
- Siren is targeting an updated MRE and comprehensive Scoping Study in Q2 2026.

Through its wholly owned subsidiary Royalco Resources (No 1) Pty Ltd, Fitzroy has a 1% royalty on all product (gold, ores, concentrates or other minerals) produced from the Sam's Creek Gold Project.
